

Description:

The KH01 are universal mono headphones. Their open design enables the user to also hear surrounding sounds while wearing the headphones. The KH01 are predestined for use in conference systems or also for the auditorium at multilingual events.

The ear pieces are padded with foam material, the head piece is adjustable in small grid spacing but with wide angle. The attaching of the cable to one side only ensures comfortable handling.

The practicable short cable prevents any annoying tangling during use. This is also helpful in greater installations, when the headphones have to be stored away after an event.

A special feature of the KH01 is the standard 3.5mm stereo – jack, which is mono configured. Firstly this enables unreserved use of a system with both mono and stereo sockets as well as the use of the 6.3mm adapter.

Technical data:

Headphones:

Transducer principle: dynamic
 Impedance: 150 Ohms
 Speaker: 2 pcs.
 30mm diameter
 Sound Pressure Level: 100dB / mW
 Frequency response: 20Hz – 20kHz
 Maximum rated power: 100mW

General:

Connectors: Stereo- Angle - Jack-,
 mono configured, 3.5mm
 with fitting screw
 Cable: 1.6 mtr.
 Climatic Conditions: 0...+50°C
 Dimensions (l x b x h): 170x130x40mm
 Weight: 50g without cable
 62g with cable
